YUKON BUREAU OF STATISTICS

Yukon Employment
May 2013

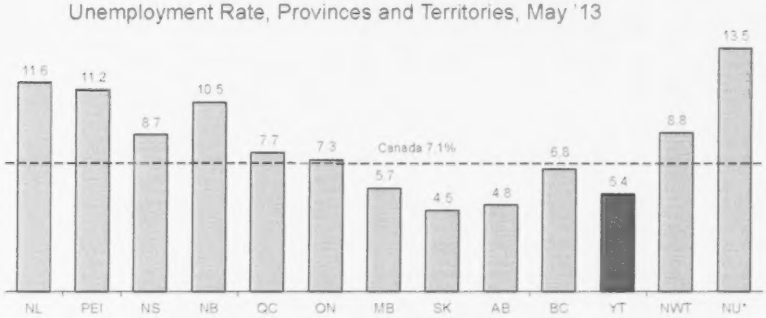
Highlights:

- In May 2013, Yukon's unemployment rate remained unchanged at 5.4% compared to April. For the second consecutive month, this was the lowest unemployment rate since December 2011.
- The national unemployment rate, 7.1%, decreased 0.1 percentage point from one month earlier.
- Compared to April, Yukon's May labour force and the number of unemployed remained the same, while the number of employed increased by 100.

May 2013 Yukon Employment at a Glance

Labour force	20,500
Employed	19,500
Unemployed	1,100
Unemployment Rate	5.4%

Unemployment Rate, Provinces and Territories, May '13



*Nunavut's unemployment rate is available only as an unadjusted estimate.

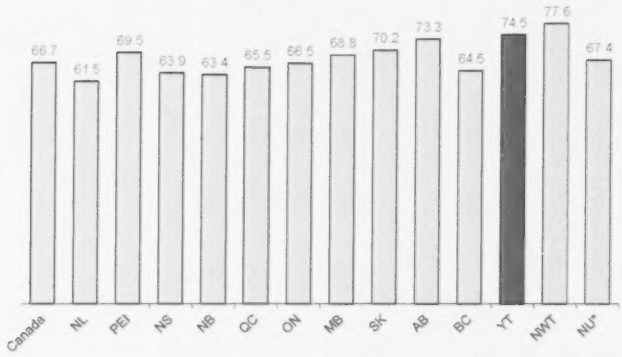
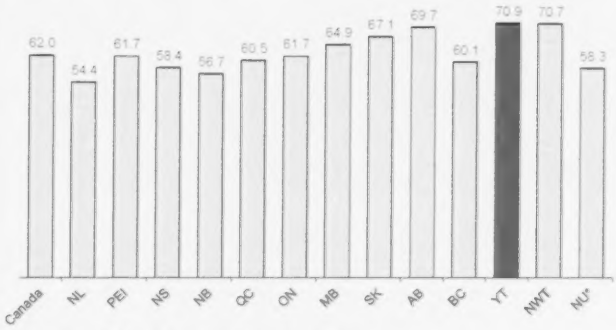
Comparisons with Canada - Snapshot

Participation Rate, May '13



Employment Rate, May '13



*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in May 2013 was 74.5%, second-highest in Canada.

Yukon's May employment rate (which measures the percent of the population which is employed), at 70.9%, is the highest in Canada, due in part to the high participation rates.

Comparisons with Canada - Historical

The Labour Force Survey estimates that 74.5% of Yukoners age 15 and over were employed or were seeking employment in May.

Although Yukon's participation rate in May (74.5%) has decreased by 0.3 percentage points compared to April 2013, it is still 1.7 percentage points higher than January of this year. January's participation rate of 72.8% was the lowest since December of 2010.

The May 2013 employment rate of 70.9%, is up 0.1 percentage point over April, and up 1.4 percentage points compared to one year earlier, May 2012 (69.5%).

Yukon's labour market in terms of participation rate and employment rate tends to be close to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

Unemployment Rate, 25+, Males and Females, May '11 - May '13

Labour Force, *Unadjusted* and Annual, age 15+

'Seasonally adjusted' refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted should not be made. For more information, see definitions on pg 8.

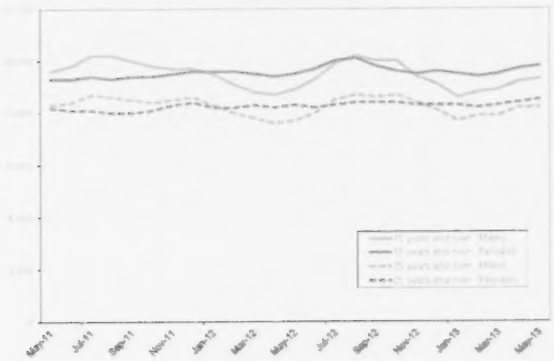
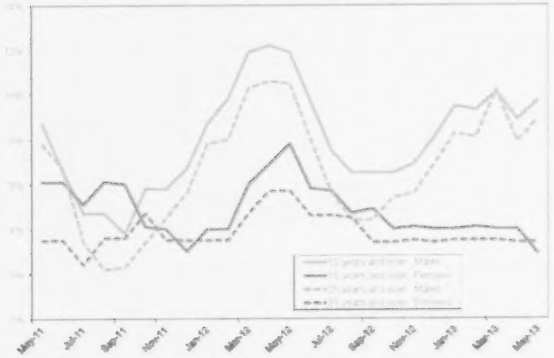
Employment by Age and Sex,
May '11 - May '13



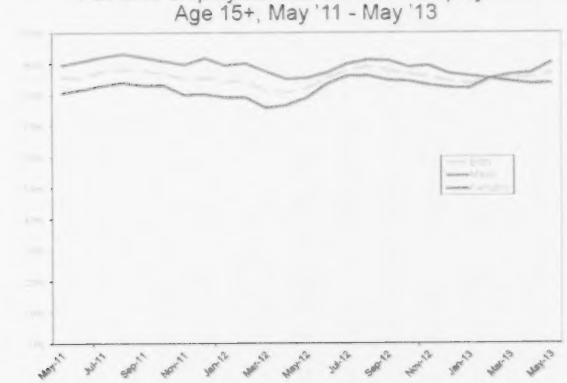
Unemployment Rate by Age and Sex,
May '11 - May '13



- Comparing May 2013 figures to April 2013, the unemployment rate for males in both the 15+ and 25+ age category increased. Conversely, the rate decreased for females in the 15+ and remained the same in the 25+ age categories. The unemployment rate for males 15+ increased from 8.9% to 9.7%; males 25+ increased from 7.9% to 8.9%. The rate for females 15+ decreased from 4.0% to 2.9% (the lowest since July 2008); females 25+ remained the same at 3.4%.
- With the exception of April 2013, youth (aged 15-24) have seen consistent unemployment rates above 10% since March of 2011. The unemployment rate for this age group in May 2013 was 11.5%.

Employment, *Unadjusted,* by Full-time/Part-time, May '13

Full-time employment as a % of all employment
Age 15+, May '11 - May '13



- 16,600, or 86.9%, of Yukon's 15+ workers were employed full-time in May 2013; third-highest among all other jurisdications.
- Nationally, 81.4% of employed Canadians worked full time in May.
- 90.3% of employed Yukon males held full-time employment, while 83.7% of females did.
- When comparing May 2013 to April 2013, full-time employment increased by 500, of which 400 were males and 100 were females.

Employment, *Unadjusted,* by Industry, May '13

	Both sexes	Males	Females
Total employed	19,100	9,300	9,800
Goods-producing sector	2,700	2,400	300
Forestry, fishing, mining, oil and gas	600	500	x
Construction	1,600	1,400	x
Services-producing sector	16,400	6,900	9,500
Trade	2,000	1,100	900
Transportation and warehousing	1,000	800	200
Finance, insurance, real estate and leasing	800	400	400
Professional, scientific and technical services	800	200	600
Business, building and other support services	700	400	300
Educational services	1,600	400	1,200
Health care and social assistance	2,800	500	2,200
Information, culture and recreation	1,100	600	500
Accommodation and food services	1,200	600	600
Other services	700	300	300
Public administration	3,700	1,500	2,200

x = suppressed for confidentiality
Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

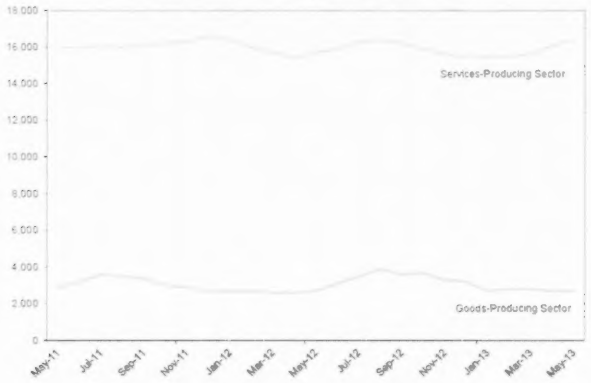
- In May 2013, 16,400, or 85.9% of working Yukoners were employed in the services-producing sector; 2,700, or 14.1% were employed in the goods-producing sector.
- 59.3% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 57.9% of workers in Yukon's services-producing sector, only 11.1% of goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, May '11 - May '13



- Compared to April 2013, employment in the goods-producing sector remained the same at 2,700. Employment in the services-producing sector (16,400) increased by 300.
- Comparing May 2013 to May 2012, employment in the goods-producing sector remained the same, while employment in the services-producing sector increased by 700, or 4.5%.

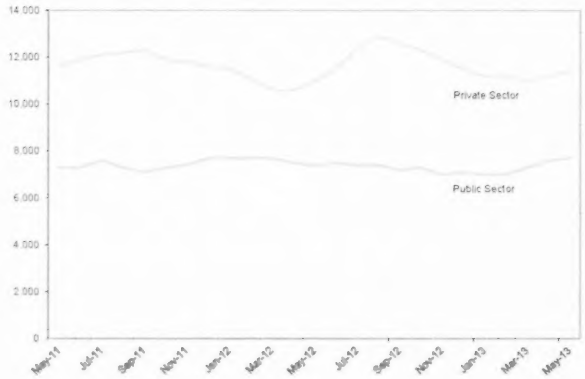
Public and Private Sectors, *Unadjusted,* May '13

	Both sexes	Males	Females
Total Employed	19,100	9,300	9,800
Public employees	7,700	2,800	4,900
Total private sector	11,400	6,500	4,900
Private employees	8,800	4,800	4,100
Self-employed	2,600	1,700	800

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In May 2013, 40.3% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 22.8% were self-employed.
- Private sector employment was up by 400, or 3.6% from May 2012, and public sector employment increased by 300, or 4.1%.

Public/Private Sector Employment, May '11 - May '13



Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as "employment/population ratio," it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April's unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories' figures are not included in the calculation of Canada's numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
